

An architectural rendering of a modern building at dusk. The building features a large, open courtyard with a complex, multi-level metal canopy structure supported by tall, slender columns. The canopy has a series of horizontal slats that allow light to filter through. The building's facade is composed of large glass panels and solid wall sections. The interior lights are on, and the courtyard is populated with people walking and sitting on large, dark, rounded stone blocks. The sky is a deep blue, and the overall atmosphere is one of a vibrant, modern urban space.

MFCU

OFFICES, LIFESTYLE & CULTURE

“You may understand why it is so easy for me to come
and support this project for the Old Municipal Slaughterhouse (...)
it is multidimensional, it has culture, economy and social cohesion.”

Marcelo Rebelo de Sousa - President of the Portuguese Republic

RECONVERSION MAINTAINING ITS HISTORICAL MEMORY AND ARCHITECTURE

The intervention program foresees the complete reconversion of the complex, maintaining its historical memory and architectural nature.

The complex features a set of industrial pavilions that are transformed into independent office buildings.

This project allows each occupier to have its own office building. This set of isolated buildings are inserted in a qualified space with an unusual characteristic.

ROOFTOP BUILDING D02

THIS PROJECT HAS ENVIRONMENTAL CERTIFICATION: LEED GOLD

This complex is characterized for being an ecologically responsible building.

The refurbishment is based on:

- Rehabilitation and reuse of existing structures
- Sustainable and local materials
- Mechanisms and devices to improve building's efficiency, air quality and lower carbon emissions

Through it's sustainable design, construction and operational standards we are **creating healthier places for people.**
